INSYTE for SQL

An alternative reporting tool for ITI Prime Users

INSYTE® for SQL is the premier reporting tool for end-users: the fastest, safest, and most intuitive reporting tool available in a Microsoft Windows environment. With **INSYTE for SQL** you can easily get the information you need from your Prime SQL databases, in the format and destination of your choice.

"I love using **INSYTE for SQL**; it is much easier to use than Viewpoint.. We are using it for quick reports in most applications."

In addition to **INSYTE for SQL** we also have **INVISION**, our comprehensive reporting package designed specifically for ITI banks that do not have a Prime database. **INVISION** is used on a regular basis by all types of bank employees.

INSYTE for SQL

One bank tells us that they have an incentive program that is so complex they wouldn't be able to do it without **INVISION**. Another bank relates that an FDIC Compliance Examiner said:

"It was the best report they had ever gotten."

Because of their exceptional versatility, **INSYTE for SQL** and **INVISION** are used for accounting summaries, auditing, billing, certification & verification, credit administration, geographic lending, income & budget comparisons, insurance tracking, loan servicing, marketing, new customer and account house-keeping, operations, quality control, retail sales, and volume analysis, for generating call reports, daily GL reports, past due reports, and reports relating to A/R delinquencies, line total commitments, new deposits, overdrafts, profitability, repricing, responsibility,

INSYTE for SQL vs. The Big Guys

Reporting tools like Cognos Impromptu® or Viewpoint and Crystal Reports® serve power users well, but are usually not well received by the average end user. **INSYTE for SQL** has been competing very effectively against Cognos Impromptu and Viewpoint.

One customer exclaimed...

"Formulas & formatting are so much easier than Viewpoint! We love the preferred field list option and fields are so much easier to find than in Viewpoint."

risk rates, summaries of all accounts by customer, stocks, and yields, and federal reporting as well as all manner of end of month reports.

Seamlessly export reports

Along with detailed or summary columnar reports with control breaks and statistics at any break level (including weighted averages and even more complex computations), **INSYTE for SQL**

can seamlessly export reports into Microsoft EXCEL®, the way you really want them exported, with actual EXCEL formulas where other programs would only export values, so that totals and other calculations automatically update as you work with the spreadsheet.

Other customer testimonials...

"**INVISION** helped us get a good handle on our customer base. Now, we can strategize, execute promotions', measure the results and then change, abandon or maintain a strategy."

"Our auditors were really surprised at the amount of information we could get them compared to other banks and how quickly we could get it."
